

FOR IMMEDIATE RELEASE

EVERGLIDE Titan™ MonsterMat™ - DKT Edition

Launch of the Everglide Titan™ MonsterMat™ - DKT Edition gaming surface co-developed by top cyber-athlete Brian "destrukt" Flander at CeBIT exhibition—Hannover (Germany)

Hannover (Germany), CeBIT 09 March 2006—Everglide™, the world's leading designer of gaming peripherals is proud to launch of the Everglide Titan™ MonsterMat™ - DKT Edition ultra-large gaming surface at the CeBIT 2006 exhibition.

Co-developed and endorsed by top professional gamer, Brian "destrukt" Flander (also known as "DKT") the ultra-large Everglide Titan™ MonsterMat™ - DKT Edition improves any gamer's speed and precision control.

Defined and developed with avid gamers in mind, this über-cool gaming surface uses Everglide's™ award-winning Fibertek™ surface technology; making it one of the most advanced mousing surface in the world today.

Everglide's Fibertek™ technology employs special woven fabrics to ensure precise tracking at minimal traction, allowing for high performance gaming with enhanced speed and control.

The gaming surface's ultra-large dimensions (444mm X 355mm X 4.3mm) provide the user with an enlarged surface to accommodate broad and spontaneous movements.

The non-slip backing ensures a stable gaming surface, allowing an uninterrupted gaming experience.

The Everglide DKT Titan™ is feather-light, razor-thin and flexible, making it easily portable and therefore ideal for the highly-mobile professional gamer.

What is Fibertek™ Technology?

The latest research and development efforts by Everglide™ are culminated in the Fibertek™ cloth surface. Fibertek™ technology refers to dedicated cloth weave incorporated into the surface of each Everglide DKT Titan™.

The intricately woven fibers of the Fibertek™ surface ensures precise targeting and tracking without limiting the velocity or acceleration of mousing movements.

By optimizing the cloth weave, Everglide's Fibertek™ woven surface ensures an accurate and precise gaming experience without compromising on the friction-free mousing movements Everglide™ mousing surfaces are renowned for.

Fibertek™ is the latest in cloth mousepad technology— highlighting Everglide's position as the leader in gaming mousing surfaces.

About Brian "destrukt" Flander

Brian "destrukt" Flander, also known in gaming circles as "DKT", is a top international professional computer gamer and champion.

Based in the Minneapolis (USA), the twenty-three year old is best-known for playing *Unreal Tournament*, *Counter-Strike*, *Painkiller* and *Quake 4* professionally.

In 2000, he won the WCGC¹ *Unreal Tournament* 1v1 competition in Seoul (Korea); he continues to win numerous cyberathlete tournaments worldwide.

Actively involved in the design of the Everglide Titan™ MonsterMat™ - DKT Edition, Brian says: "Everyone should use the Everglide Titan™ MonsterMat™ - DKT Edition. It was designed for all serious gamers and provides me with a surface that is consistent and precise."

Brian's involvement in the design of the Everglide Titan™ MonsterMat™ - DKT Edition demonstrates Everglide's close relationship with top professional gamers and therefore the company's commitment to creating gaming peripherals directly addressing computer gamers' needs.

About Everglide

Everglide™, based in San Diego California, is one of the world's leading designers and manufacturers of enhanced gaming peripherals. Optimizing game play for a wide range of games such as *Counterstrike*, *Quake* and *Painkiller*, Everglide™ is also regarded as one of the leading brands in home and office peripherals.
